- Step-by-step Wizard ensures rapid deployment and increased usage by end users
- Robust Security
- Dynamic Layout Designer
- Integrated with XML Publisher
- Multiple Outputs: HTML, EXCEL, PDF, RTF, CSV
- Advanced Analytics including Filters, Drill Down, Drill on graphs, Drill out to external applications
- Drag and Drop features
- Pivot capabilities: HTML, EXCEL
- Automatically Email reports
- Jump start your implementation with dozens of seeded reports
- Exclusive features for Reporting Administrators
- Context sensitive help
- Certified on Release 11i and Release 12

## REPORTING WORKBENCH™

*Reporting Workbench™ for Oracle E-Business Suite is a powerful, high performance, reporting application for creating simple to most complex reports for any organization.*

*Reporting Workbench™ uses the same technology that is used by Oracle Corporation to build their Core Products.*

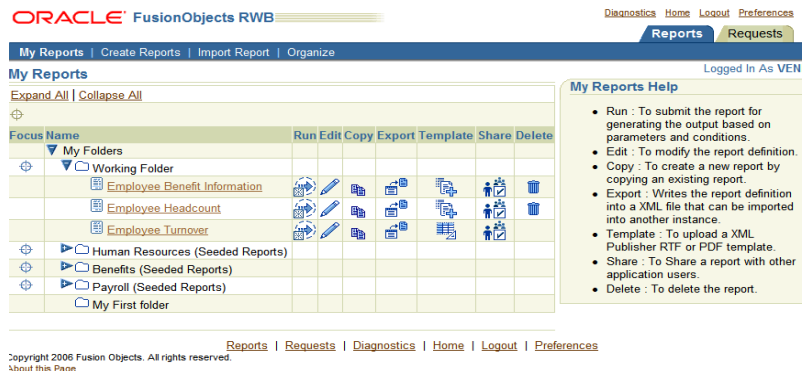

*This means zero upgrade issues when you upgrade from Release 11i to Release 12, period.*

## POWERFUL PERFORMANCE

Reporting Workbench™ comes pre-seeded with already tuned views across all Oracle ERP applications. That's over 1,800 reporting views across Oracle HRMS, Financials, Manufacturing, CRM to jump start your reports development projects. Reporting Workbench™ is handling the reporting needs of small customers and Fortune 500 customers.

## EASY TO USE

Reporting Workbench™ provides an easy to use reporting experience for power users as well as end users. Reporting Workbench™ has the same user interface as Oracle Self Service applications, thus eliminating the need for training. Built-in wizards provide step-by-step guidance to produce pixel-perfect reports in minutes.

## KEY BENEFITS

- Produce reports in a fraction of time compared with traditional reports development tools
- Over 1,800 views to jump start your reports development
- Wizards provide step-by-step guidance
- Easily include external data sources in your reports
- Access data in a variety of ways: HTML, XML, PDF, Excel, CSV, HTML Pivot, Excel Pivot
- Already certified on Release 11i and Release 12
- Certified on Oracle On Demand
- Robust security gives you the peace of mind that data can be only accessed by users in conformance with your security policies
- Uses same technology that is used by Oracle Corporation. That means no upgrade risks when you go from Release 11i to Release 12

## SECURITY

Reporting Workbench™ uses the same security that is utilized by Oracle Applications. That means users use the same user name and password that is authenticated by Oracle applications and they can only see data as per their security profile definitions. Additionally, Administrators can restrict users to access role based features and functions of Reporting Workbench™.

The screenshot shows the Oracle FusionObjects RWB interface. The top navigation bar includes 'Reports' and 'Requests'. The main area is titled 'My Reports' and contains a table of reports. A sidebar on the right titled 'My Reports Help' lists actions like Run, Edit, Copy, Export, Template, Share, and Delete.

## ADVANCED ANALYTICS

Users can choose to view their data in a variety of ways including the tabular form, graphs, PDF, HTML pivot, and Excel pivot tables. Drilling down on graphs is as easy as clicking on the graph and you can drill all the way down to the lowest level detail. Now you can produce high quality Executive Dashboards as well as typical data intensive reports all with in one reporting solution.

The screenshot shows the Oracle E-Business Suite interface. The top navigation bar includes 'Reports' and 'Requests'. The main area is titled 'My Requests' and contains a table of report requests. A dropdown menu is open, showing options like 'All', 'Completed', 'Last 24 Hours', 'Pending', and 'Running'.

Select	Request Id	Report Name	Phase	Status	Run Date	HTML	HTML Pivot	XML	CSV	Excel	Pivot Excel	RTF	PDF	Row Count	Log	Cancel	Re-Run
<input type="checkbox"/>	2758956	Employee Benefit Information	Completed	Normal	06-Dec-2006 10:35:22									3	Log
